My name is Hoang, and I am currently a fourth-year student at Open University. I am an enthusiastic learner, always striving to improve my skills and knowledge. I am very determined and I never give up when I face challenges.

Skills

HTML/CSS (SCSS):

- Proficient in using HTML and CSS to create websites with a professional and interactive look.
- Experience in making websites that work well on different devices (responsive design).
- Skilled in using SCSS for easy-to-maintain CSS code.

Reactjs:

- Knowledgeable in ReactJS for building dynamic websites and using APIs with Axios or Fetch.
- Able to pass data between website parts using "props" and control how the website behaves using "hooks."

JavaScript & TypeScript:

- Knowledgeable in JavaScript and TypeScript to create features for websites.
- Use TypeScript to write safer and easier-to-understand code.

Java:

- Understanding of Java, including making different parts (like classes and objects) and handling problems.
- Know about Object-Oriented Programming (OOP) principles.

C# C++:

- Basic knowledge of C# and C++.
- Worked with C# for building Windows apps or ASP.NET web apps.

Spring Boot:

- Have experience with Spring Boot for creating apps.
- Understand basic ideas like how to control what happens when people visit a website and how to organize your work.

ASP.NET MVC:

- Know about ASP.NET MVC and worked on making websites this way.
- Can create different parts like controllers, views, and models in the MVC way.

Database management:

- Skilled in using Microsoft SQL Server and MySQL for managing data.
- Know how to design data tables, connect them, and write more advanced queries. Also, make sure the data looks good and is correct.

Git:

- Experience with common Git commands such as commit, push, pull, branch, and merge.

Postman:

- Knowledgeable in Postman for testing APIs.
- Can make and run requests to APIs.

Experience

● Website find jobs 9/2023 - Present
